

NAVIGATING THE PATIENT RECORD

PATIENT SUMMARY TAB

- Clinical Documents
- CCD creator, aka Patient Snapshot
(under "Dynamic Documents")
- Allergies
- Demographics
- Encounters
- Medications
- Procedures
- Problems

The Patient Summary Tab is where the user lands after selecting a patient record to enter. Here is where you will find clinical documents, allergies, demographic information, a history of encounters with diagnoses, medications, procedures and active problems. There is also a customizable continuity of care document creator, called the patient snapshot.

Encounter History

Admission	Discharge	Admit Reason	Discharge Diagnosis	Visit Type	Specialty	Facility	Clinician	Attenders
Jan-10-2021	Jan-10-2021	LEFT SIDE PAIN	Calculus of ureter	Emergent		Miners Collfax Medical Center		RENEE KING
Apr-20-2020	Apr-20-2020	L		Outpatient		Miners Collfax Medical Center		CHRISTINE LOPEZ MD
Apr-11-2008	Apr-16-2008			Inpatient	Medical Service	Red Regional Hospital	Dr Joe MARTIN	Joe Martin
Apr-11-2008	Apr-14-2008	Nausea	Hepatitis A - current infection	Inpatient	Medical	Red Regional	Dr Joe	Joe Martin

The Patient Summary is displayed upon entry into patient record, and when you are viewing a patient record, the patient context bar will always be visible with the patient's name, gender, and date of birth.

At the top right, are your navigation tools that allow you to close the record, jump to other patient records, go to your home screen, visit your preferences screen or get to context sensitive help reference materials. The upper right corner is where you will log out when you are finished using the portal.

To the right, you will find patient demographic information, including other identifying numbers, address, phone numbers, and next of kin. In the upper right section, you will see allergies that have been reported for the patient.

Below these sections, you will find the patient's encounter history.

CLINICAL DOCUMENTS

The screenshot shows the 'Clinical Documents' section of a software interface. At the top, there's a 'Patient Summary' tab. Below it, the 'Clinical Documents' header has icons for visibility, search, and refresh. A search bar is present with the text 'Showing All Mark All As Read'. Below the search bar, there are options for 'Group By' (Category) and 'Sort By' (Date). A list of document categories follows: 'Patient Summary', 'Bulk Print Results', 'PDMP Report URL', 'Dynamic Documents (1)', 'Laboratory (96 / 106)', 'Microbiology (4 / 5)', and 'Radiology (3 / 4)'. A red box highlights the search bar and the category list. A blue arrow points to the 'Microbiology' category. Another blue arrow points to the 'Expand or Collapse Categories' link at the bottom. A text box on the right lists search and display options. A small red pin icon is next to the first option in the text box. A speaker icon is in the bottom right corner.

- Search for a known test, e.g., HbA1c
- Show All or a Specified Date Range
- Group by Category, Date, Service, or Author
- Sort by Date, Title or Author

Numbers indicate the (unread / read) reports in each category.

Expand or Collapse Categories

Directly under the Patient Summary tab, you'll find the clinical documents section, with helpful search and configuration tools on top to make it easier to find a specific result or note you may be looking for.

The reports and other documents will be categorized, and the sections collapsed by default, but you can click on the right facing triangles to expand each section.

The bold numbers beside the category headings indicate the number of reports that you have not yet read, with a denominator indicating the total number of reports in that category.

The Clinical Documents section can be thought of as a file cabinet for the patient's reports. It displays all available results and notes.

For each expandable category, the number of results under that header are shown in parentheses, with the numerator in bold indicating the number of unread documents. Within just a couple of clicks, you can read individual reports.

Generate a Continuity of Care Document (CCD), aka Patient Snapshot

The Patient Snapshot command, under Dynamic Documents, allows you to create a patient snapshot or Continuity of Care document, often referred to as a CCD or CCDA.

Patient Snapshot [Download](#) | [Print](#) | [View CDA](#) | [Customize](#) | [Send via Portal](#)

 Changes to the patient snapshot are temporary. They will be remembered until you leave this page, or the page is refreshed.

Continuity of Care Document

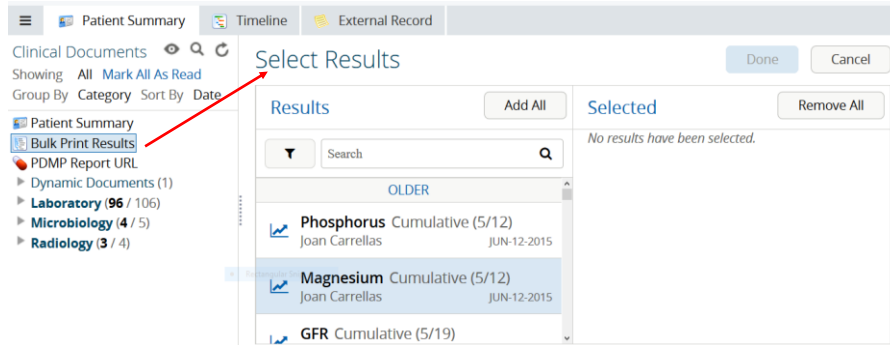

Generated by: Orion Health Shared Platform Generation Date: Jun-20-2021

 SYNCRONYS
BETTER DATA. BETTER HEALTH.

The default timeframe for generating a CCD with this portal is 1 year. It contains allergies, problems, medications, procedures, results, notes, and encounters. You can modify the standard CCD by clicking on the “Customize” link and choosing a different time frame for any of these categories.

CLINICAL DOCUMENTS

- Bulk Print Results feature

A new feature in the SYNCRONYS portal is the Bulk Print Results tool. This allows you to select specific clinical documents to assemble into a single PDF document. For example, you may wish to bring together certain clinical notes to send to another member of the patient's health care team instead of a full CCD.

VIEWING NUMERIC RESULTS - CUMULATIVE

Exam: 1 view abdomen with time stamped of 1632 and 1 view abdomen with time stamp of 1640

Date: 6/11/2020 5:28 PM MST

History: NG tube placement

Comparison: CT from 6/8/2020

FINDINGS/

The initial image demonstrates a nasogastric tube with the tip at the mid esophagus. On the 2nd image the tip is in the gastric fundus with the proximal side port at the gastroesophageal junction. There is mild gaseous distention of bowel loops in the upper abdomen.

The preceding report was prepared using voice recognition technology. Attempts were made to correct for accuracy, but please excuse grammatical or punctuation errors. Electronically Signed by: Kevin Lee MD on 6/11/2020 5:31 PM MST Reading Workstation:SFINWKS11

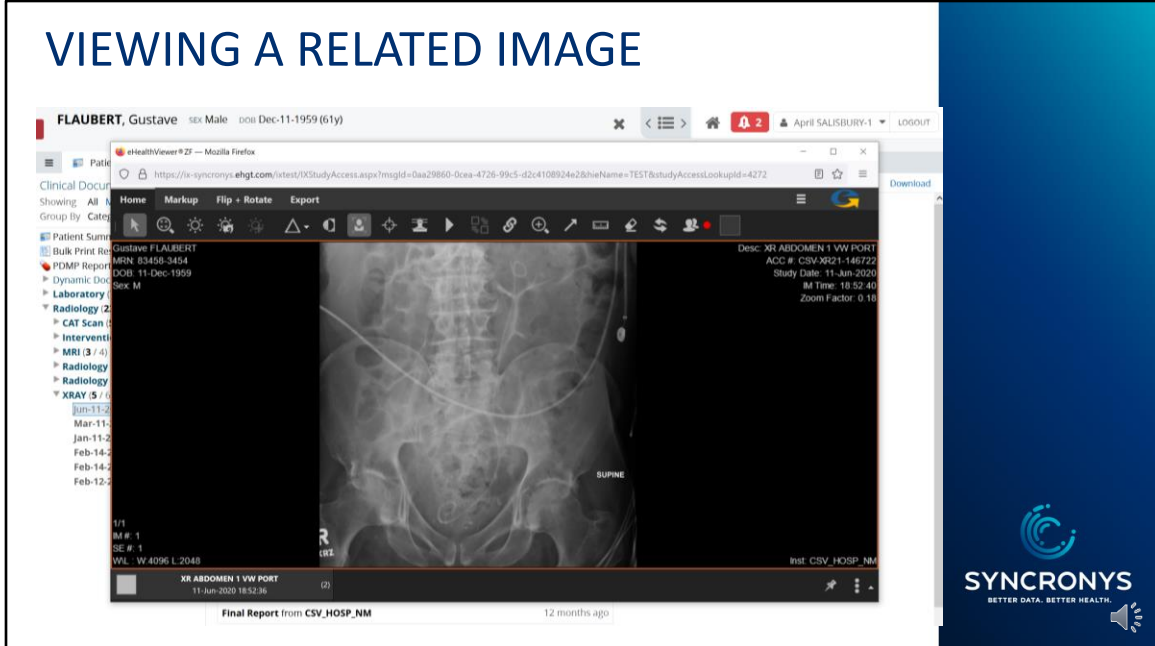

Report History

Final Report from CSV_HOSP_NM

12 months ago

When you select a textual report, for example this abdominal x-ray, you will be able to read it, print it as a PDF, or send it to another HIE user via portal messaging. You will also see a Link to View Image, so if this radiology report has been sent by one of the radiology service providers that is sharing images as well as reports, you will be able to see the related image in diagnostic quality through the SYNCRONYS portal.

VIEWING A RELATED IMAGE

After clicking on the View Image link, the eHealthViewer launches, showing you the high-quality image. You can collaborate with other HIE portal users in real-time using the “Share this session” icon.

Medication History

Medication	Dose	Sig	Route	Start	Stop	Prescribed By	Status	Facility
SIMVASTATIN	TAB	Once Per Day in the evening	Oral (0 routes not shown)	05/07/2014	06/07/2014		Ordered	AHP

To the right of the Clinical Documents section, you will find tables, called windowlets that show:

- Demographics
- Allergies
- Encounter History
- Medications
- Procedures and
- Active Problems

All tables are sortable in ascending or descending order by clicking on the desired column header, and the default order is by date.

The screenshot displays a medical portal interface. On the left, a sidebar shows a 'Patient Summary' with categories like Clinical Notes, Discharge Summary, Dynamic Documents, Laboratory, and Radiology. The main area is titled 'Encounter History' and contains a table with columns: Admission, Discharge, Admit Reason, Discharge Diagnosis, Visit Type, and Special. A red box highlights a magnifying glass icon in the 'Admission' column of a row dated 03/06/2013. Another red box highlights the 'Discharge Diagnosis' for that encounter: 'Stable Angina (853) (1 diagnoses not shown)'. A third red box highlights a search results window titled 'Search Results - Mozilla Firefox' which lists 'Diagnosis' results: 'Stable Angina (853)' and 'Cardiovascular Disease (I51.9)'. The search results window is open over the magnifying glass icon.

Admission	Discharge	Admit Reason	Discharge Diagnosis	Visit Type	Special
03/06/2013	03/06/2013	Cardiology Check	Stable Angina (853) (1 diagnoses not shown)	OUTPATIENT	CARD
01/06/2013	01/06/2013	Scheduled follow up	Diabetes (5) (1 diagnoses not shown)	EMERGENCY	EME
01/06/2013	01/06/2013	Chest Pain	Stable Angina (853) (0 diagnoses not shown)	INPATIENT	CARD MED

The relevant discharge diagnosis can be seen in the Encounter History table, but often there is more than one. Use the Magnifying Glass icon to get more details on other diagnoses related to the encounter.

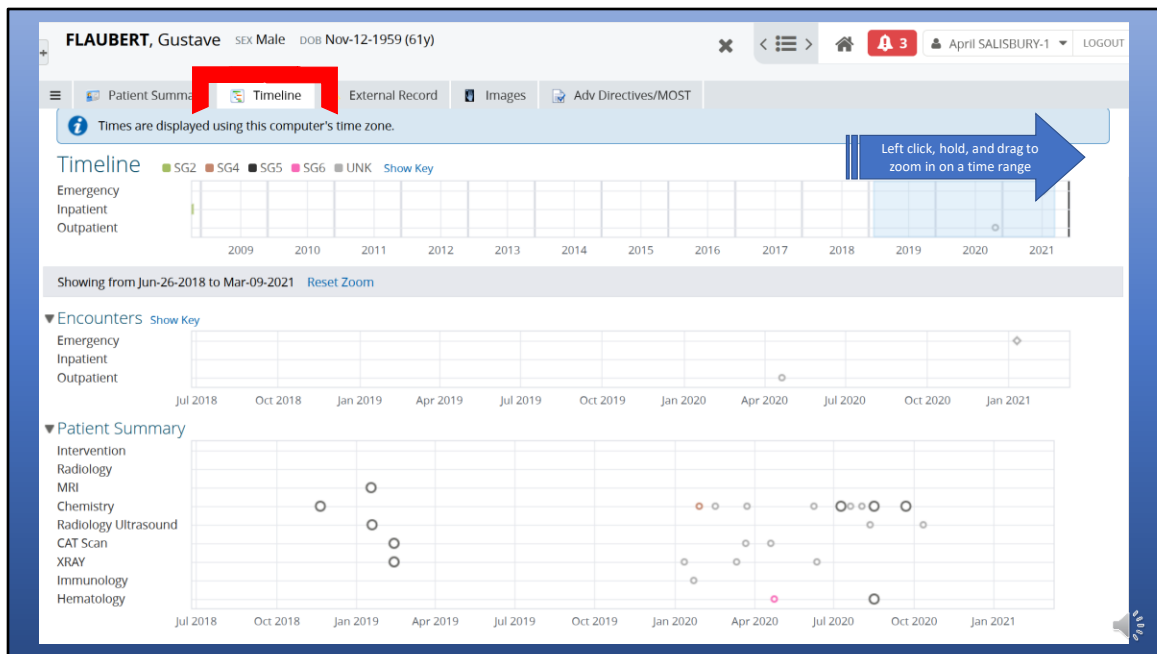

Medicines Viewer

Search filters: All Event Types, Medication, Actioned By, Source. Time frame: 3 Years.

Group by: Medication, Date.

Medication	Instructions	Route	Supply Qty.	Days Supply	Action Date	Actioned By	Event Type
Jantoven - warfarin sodium 3 MG Oral Tablet	-	Oral	-	-	15 Aug 2019	Adam Spencer	Administrative
Jantoven - warfarin sodium 3 MG Oral Tablet	-	Oral	-	-	14 Aug 2019	Adam Spencer	Administrative
Jantoven - warfarin sodium 3 MG Oral Tablet	-	Oral	-	-	13 Aug 2019	Adam Spencer	Administrative
Jantoven - warfarin sodium 3 MG Oral Tablet	-	Oral	-	-	12 Aug 2019	Adam Spencer	Administrative
Jantoven - warfarin sodium 3 MG Oral Tablet	-	Oral	-	-	11 Aug 2019	Adam Spencer	Administrative
Aspi-Cor 81 MG Delayed Release Oral Tablet	Take ONE tablet at night	oral	90 tablets	90 days	01 Aug 2019	Joe Bloggs	Dispense
Jantoven - warfarin sodium 3 MG Oral Tablet	Take ONE tablet at 6pm	oral	90 tablets	90 days	01 Aug 2019	Joe Bloggs	Dispense

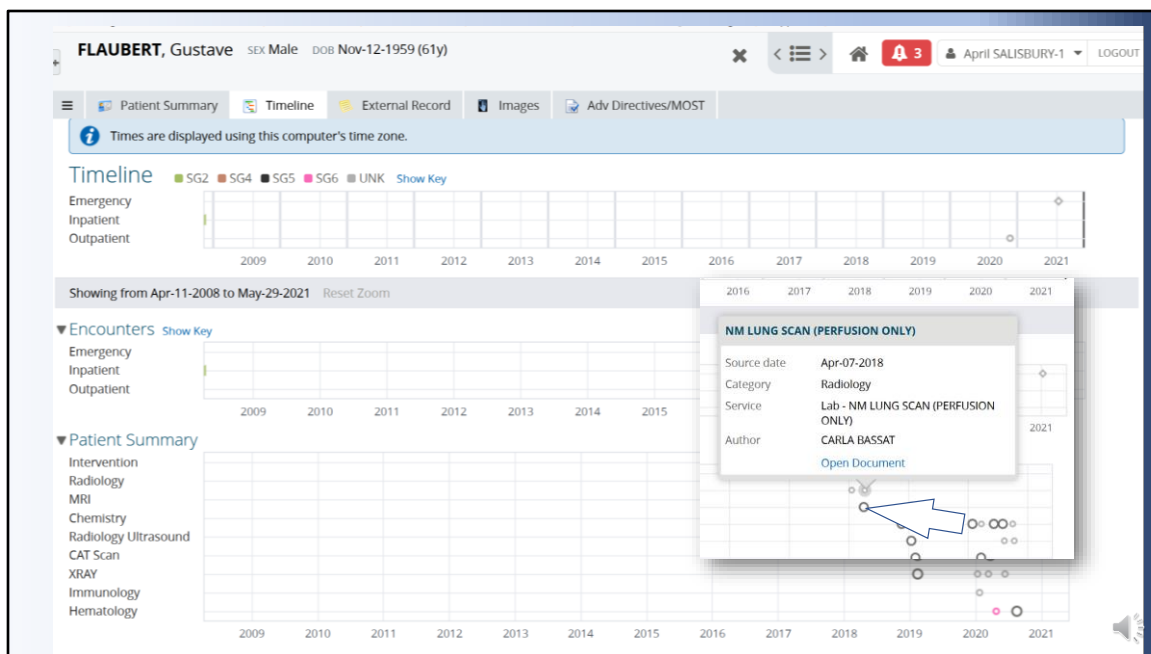

There is a medications windowlet, but the more robust Medicines Viewer is a new feature. To use it, click on the square icon next to the Medications title. This tool will allow you to organize the medications list by event type and to configure the time frame you are interested in. You can group by medication or date. You can also search by Medication, person Actioned By, and the source.

We've been looking at the Patient Summary screen, but right next door is a useful tab called Timeline. This tab gives you a graphic representation of everything that was on the patient summary screen.

At the top, you'll easily see when a patient was seen in an emergency room, admitted or discharged from an inpatient stay, or had an outpatient encounter. Below, you can see data points revealing test results and reports.

To focus on a specific time frame, left click and drag your cursor over the graph and watch the graph below zoom in.

Hovering over a data point will give you a popup with details and offer you the option of opening up the document. You can always go back to the Patient Summary by clicking on that tab.

NAVIGATING THE PATIENT RECORD

We want the clinical portal to make effective use of your time, while providing a more complete picture of your patient's health. Please watch for announcements and updated training information as we continuously improve your health information exchange.
